

# Table of Contents

---

<b>PREFACE .....</b>	<b>I</b>
<b>CONTENTS AT A GLANCE .....</b>	<b>III</b>
<b>TABLE OF CONTENTS .....</b>	<b>IV</b>
<b>CHAPTER 1      INTRODUCTION .....</b>	<b>1</b>
1.1    What is Software Engineering? .....	1
1.1.1    Why Software Engineering Is Difficult (1) .....	6
1.1.2    Book Organization .....	7
1.2    Software Engineering Lifecycle .....	7
1.2.1    Symbol Language .....	10
1.2.2    Requirements Analysis and System Specification .....	11
1.2.3    Object-Oriented Analysis and the Domain Model .....	13
1.2.4    Object-Oriented Design .....	15
1.2.5    Project Estimation and Product Quality Measurement .....	17
1.3    Case Studies .....	21
1.3.1    Case Study 1: From Home Access Control to Adaptive Homes .....	22
1.3.2    Case Study 2: Personal Investment Assistant .....	25
1.4    Object Model .....	36
1.4.1    Relationships and Communication .....	37
1.4.2    Polymorphism, Inheritance, and Delegation .....	38
1.4.3    Example .....	39
1.4.4    Design of Objects .....	40
1.5    Student Team Projects .....	41
1.5.1    Stock Market Investment Fantasy League .....	41
1.5.2    Web-based Stock Forecasters .....	44
1.5.3    Remarks about the Projects .....	46
1.6    Summary and Bibliographical Notes .....	49
<b>CHAPTER 2      OBJECT-ORIENTED SOFTWARE ENGINEERING .....</b>	<b>52</b>
2.1    Software Development Methods .....	53

2.1.1	Agile Development.....	54
2.1.2	Decisive Methodological Factors .....	56
2.2	Requirements Engineering .....	58
2.2.1	Types of Requirements.....	64
2.2.2	Problem Architecture.....	65
2.2.3	User Stories for Agile Development .....	70
2.2.4	Requirements Gathering Strategies .....	72
2.3	Use Case Modeling.....	73
2.3.1	Actors, Goals, and Sketchy Use Cases .....	73
2.3.2	System Boundary and Subsystems.....	80
2.3.3	Detailed Use Case Specification.....	81
2.3.4	Risk Analysis and Reduction .....	90
2.3.5	Why Software Engineering Is Difficult (2).....	91
2.4	Analysis: Building the Domain Model .....	91
2.4.1	Identifying Concepts.....	92
2.4.2	Concept Associations and Attributes .....	96
2.4.3	Contracts: Preconditions and Postconditions .....	101
2.5	Design: Assigning Responsibilities .....	101
2.5.1	Design Principles for Assigning Responsibilities .....	105
2.5.2	Class Diagram.....	111
2.5.3	Why Software Engineering Is Difficult (3).....	114
2.6	Software Architecture .....	115
2.7	Implementation and Testing.....	117
2.7.1	Software Implementation .....	117
2.7.2	Refactoring: Improving the Design of Existing Code .....	122
2.7.3	Overview of Software Testing.....	123
2.7.4	Test Coverage and Code Coverage.....	125
2.7.5	Practical Aspects of Unit Testing .....	129
2.7.6	Integration and System Testing .....	130
2.8	Summary and Bibliographical Notes .....	133
	Problems.....	137
<b>CHAPTER 3</b>	<b>MODELING AND SYSTEM SPECIFICATION .....</b>	<b>151</b>
3.1	What is a System? .....	152
3.1.1	World Phenomena and Their Abstractions.....	153
3.1.2	States and State Variables.....	157
3.1.3	Events, Signals, and Messages.....	162
3.1.4	Context Diagrams and Domains .....	164
3.1.5	Systems and System Descriptions.....	166

3.2	Notations for System Specification .....	167
3.2.1	Basic Formalisms for Specifications.....	167
3.2.2	UML State Machine Diagrams.....	174
3.2.3	UML Object Constraint Language (OCL) .....	177
3.2.4	TLA+ Notation .....	182
3.3	Problem Frames .....	184
3.3.1	Problem Frame Notation.....	185
3.3.2	Problem Decomposition into Frames.....	186
3.3.3	Composition of Problem Frames.....	189
3.3.4	Models.....	190
3.4	Specifying Goals.....	191
3.5	Summary and Bibliographical Notes .....	192
	Problems.....	193
<b>CHAPTER 4</b>	<b>SOFTWARE MEASUREMENT AND ESTIMATION.....</b>	<b>198</b>
4.1	Fundamentals of Measurement Theory.....	199
4.1.1	Measurement Theory .....	200
4.2	What to Measure? .....	202
4.2.1	Use Case Points .....	203
4.2.2	Cyclomatic Complexity .....	212
4.3	Measuring Module Cohesion.....	214
4.3.1	Internal Cohesion or Syntactic Cohesion .....	214
4.3.2	Interface-based Cohesion Metrics.....	216
4.3.3	Cohesion Metrics using Disjoint Sets of Elements .....	217
4.3.4	Semantic Cohesion .....	218
4.4	Coupling .....	218
4.5	Psychological Complexity .....	219
4.5.1	Algorithmic Information Content.....	219
4.6	Effort Estimation .....	221
4.6.1	Deriving Project Duration from Use Case Points.....	222
4.7	Summary and Bibliographical Notes .....	223
	Problems.....	225
<b>CHAPTER 5</b>	<b>DESIGN WITH PATTERNS.....</b>	<b>227</b>
5.1	Indirect Communication: Publisher-Subscriber.....	228
5.1.1	Applications of Publisher-Subscriber .....	235
5.1.2	Control Flow .....	236
5.1.3	Pub-Sub Pattern Initialization .....	238
5.2	More Patterns.....	238

5.2.1	Command .....	239
5.2.2	Decorator .....	242
5.2.3	State .....	243
5.2.4	Proxy .....	245
5.3	Concurrent Programming .....	252
5.3.1	Threads .....	253
5.3.2	Exclusive Resource Access—Exclusion Synchronization .....	255
5.3.3	Cooperation between Threads—Condition Synchronization .....	257
5.3.4	Concurrent Programming Example .....	258
5.4	Broker and Distributed Computing .....	264
5.4.1	Broker Pattern .....	267
5.4.2	Java Remote Method Invocation (RMI) .....	269
5.5	Information Security .....	276
5.5.1	Symmetric and Public-Key Cryptosystems .....	278
5.5.2	Cryptographic Algorithms .....	279
5.5.3	Authentication .....	281
5.5.4	Program Security .....	281
5.6	Summary and Bibliographical Notes .....	283
	Problems .....	286
<b>CHAPTER 6</b>	<b><u>XML AND DATA REPRESENTATION .....</u></b>	<b><u>300</u></b>
6.1	Structure of XML Documents .....	303
6.1.1	Syntax .....	303
6.1.2	Document Type Definition (DTD) .....	309
6.1.3	Namespaces .....	313
6.1.4	XML Parsers .....	315
6.2	XML Schemas .....	317
6.2.1	XML Schema Basics .....	318
6.2.2	Models for Structured Content .....	323
6.2.3	Datatypes .....	326
6.2.4	Reuse .....	333
6.2.5	RELAX NG Schema Language .....	333
6.3	Indexing and Linking .....	334
6.3.1	XPointer and Xpath .....	334
6.3.2	XLink .....	335
6.4	Document Transformation and XSL .....	336
6.5	Summary and Bibliographical Notes .....	339
	Problems .....	340

<b>CHAPTER 7</b>	<b>SOFTWARE COMPONENTS.....</b>	<b>342</b>
7.1	Components, Ports, and Events .....	343
7.2	JavaBeans: Interaction with Components.....	344
7.2.1	Property Access.....	345
7.2.2	Event Firing.....	345
7.2.3	Custom Methods.....	346
7.3	Computational Reflection.....	347
7.3.1	Run-Time Type Identification.....	348
7.3.2	Reification .....	349
7.3.3	Automatic Component Binding .....	350
7.4	State Persistence for Transport .....	350
7.5	A Component Framework .....	351
7.5.1	Port Interconnections .....	351
7.5.2	Levels of Abstraction .....	353
7.6	Summary and Bibliographical Notes .....	354
	Problems.....	354
<b>CHAPTER 8</b>	<b>WEB SERVICES .....</b>	<b>355</b>
8.1	Service Oriented Architecture .....	357
8.2	SOAP Communication Protocol.....	358
8.2.1	The SOAP Message Format .....	359
8.2.2	The SOAP Section 5 Encoding Rules .....	364
8.2.3	SOAP Communication Styles .....	367
8.2.4	Binding SOAP to a Transport Protocol .....	370
8.3	WSDL for Web Service Description .....	371
8.3.1	The WSDL 2.0 Building Blocks.....	372
8.3.2	Defining a Web Service's Abstract Interface .....	375
8.3.3	Binding a Web Service Implementation .....	377
8.3.4	Using WSDL to Generate SOAP Binding.....	378
8.3.5	Non-functional Descriptions and Beyond WSDL.....	379
8.4	UDDI for Service Discovery and Integration.....	380
8.5	Developing Web Services with Axis.....	381
8.5.1	Server-side Development with Axis.....	381
8.5.2	Client-side Development with Axis .....	387
8.6	OMG Reusable Asset Specification .....	388
8.7	Summary and Bibliographical Notes .....	389
	Problems.....	390
<b>CHAPTER 9</b>	<b>FUTURE TRENDS.....</b>	<b>391</b>

9.1	Aspect-Oriented Programming .....	392
9.2	OMG MDA .....	393
9.3	Autonomic Computing .....	393
9.4	Software-as-a-Service (SaaS) .....	394
9.5	End User Software Development .....	394
9.6	The Business of Software .....	397
9.7	Summary and Bibliographical Notes .....	397
<b>APPENDIX A</b>	<b><u>JAVA PROGRAMMING .....</u></b>	<b><u>398</u></b>
A.1	Introduction to Java Programming .....	398
<b>APPENDIX B</b>	<b><u>NETWORK PROGRAMMING .....</u></b>	<b><u>400</u></b>
B.1	Socket APIs .....	400
B.2	Example Java Client/Server Application .....	405
B.3	Example Client/Server Application in C .....	408
B.4	Windows Socket Programming .....	411
<b>APPENDIX C</b>	<b><u>HTTP OVERVIEW.....</u></b>	<b><u>414</u></b>
C.1	HTTP Messages .....	415
C.2	HTTP Message Headers .....	419
C.3	HTTPS—Secure HTTP .....	422
<b>APPENDIX D</b>	<b><u>DATABASE-DRIVEN WEB APPLICATIONS .....</u></b>	<b><u>423</u></b>
<b>APPENDIX E</b>	<b><u>DOCUMENT OBJECT MODEL (DOM) .....</u></b>	<b><u>424</u></b>
E.1	Core DOM Interfaces .....	424
<b>APPENDIX F</b>	<b><u>USER INTERFACE PROGRAMMING.....</u></b>	<b><u>427</u></b>
F.1	Model/View/Controller Design Pattern.....	427
F.2	UI Design Recommendations.....	427
	<b><u>SOLUTIONS TO SELECTED PROBLEMS.....</u></b>	<b><u>429</u></b>
	<b><u>REFERENCES .....</u></b>	<b><u>502</u></b>
	<b><u>ACRONYMS AND ABBREVIATIONS .....</u></b>	<b><u>512</u></b>
	<b><u>INDEX .....</u></b>	<b><u>514</u></b>
